

Vision for the Future

Town of Grand Island: Nike Base Park

Nike Base Park is a recreational asset with diverse amenities. It enhances our quality of life by nurturing the health and well-being of all age groups, our natural environment and the economic vitality of our community. Together and often in partnership with others we strive to:

- Help children, adults and our senior citizens achieve a healthy, active and balanced lifestyle through participation in active and passive recreational pursuits.
- Strengthen and reinforce those essential social interactions and foundations that support inclusivity for all age groups from the very young to the most senior members of our community which in turn will help achieve the goal of establishing and maintaining a vibrant society.
- Instill in everyone the principles of environmental stewardship by increasing awareness through education and participation in outdoor activities that emphasize ecological values and build respect for nature.
- Promote fitness and wellness programs that reduce dependence on health and social services while at the same time encouraging sensible recreation resource growth that attracts park users and adds economic, social and environmental value to our community.
